If you are an undergraduate student in your penultimate year of the Bachelor of Civil Engineering (Geotechnical or Environmental), you may be eligible to apply for the Golder Associates Pty Ltd Geotechnical and Environmental Engineering Scholarship valued at $4,000.

To be considered for the scholarship applicants must:

- Be enrolled full time
- Be enrolled in your penultimate year of the Bachelor of Engineering (Civil Geotechnical), the Bachelor of Engineering (Civil Environment) or a program of study specialising in Geotechnical or Environmental engineering
- Be an Australian citizen or permanent resident
- Be a high performing student with a minimum distinction average for the preceding year, show leadership and team work.

The scholarship is tenable for 1 year and is subject to academic performance review. Continuation of the scholarship is subject to the scholar achieving a distinction average the previous semester.

Paid work experience may be offered to the scholarship recipient by Golder Associates outside the scholarship agreement.

Complete and submit the relevant scholarship application form and include a CV stating career and other community involvement to date, and a written letter of application outlining leadership, team work, and why you meet the graduate profile for future Geotechnical and Environmental Engineers.

Students will be required to attend an interview. The panel will be made up of a representative from Golder Associates, the Associate Dean of Education and a senior academic from Civil Engineering.
